**Abstract:** This Research study based on "Mixed Schools of Muslim Division and the Social Effects Caused by them: A Research based on Maruthamunai." Maruthmunai is the Research area and its situated in Ampara district in Kalmunai Zonal Education. Maruthamunai is one of the Most Muslims Mixed School areas in Ampara district. Maruthamunai has totally seven Muslim Mixed School. And also 6258 Students are Studying in these Schools. According to this total amount of Students divided in 3711 male and 2547 female Students are studying currently this research study based on this research area living Parents and Students to identify social effects in Muslim Mixed School. According to this Dissertation to identify past. history of Muslims Mixed Schools, and identify what are the social effects are created by these Muslims Mixed Schools. And also, Providing Suggestion and Recommendation for these Social effects through this study. These Suggestion and Recommendation are Might be a guide for future researchers in these areas. The Method of the data Collection is generally based on the type of the research objectives and the type of the data or required. The data could be divided in tow Major parts as primary data and secondary data. Primary data is obtained from questionnaire for separated to Parents and Students. Secondary data is the data which is already available for Zonal Director of Education office reports, School Records books, Related Research book, Research Articles and access through internets. And also historical, social and behavioral researches are focused on this research study. Some of the related data connect with "Excel" program to finish successfully. According to this data Collection Method this research divided into five major Chapters. These Chapters are divided based on the research objectives. First Chapter of these research study focused on Introduction of research topic, Second Chapter deal with history of Education background of this research area, third is history of Maruthamunai Muslim people and origin of Muslim Mixed Schools. Fourth Chapter Focused on Analysis of Muslim Mixed Schools Social and Cultural effects between School Students. And identified and provided Suggestion and Recommendation for that effects. Fifth Chapter is provided full picture of the Conclusion, and Recommendation for future researchers. According to this research, Researcher is analyzed all efforts based on the research

objectives. This Research study finding and conclusion is Muslims Mixed Schools are affected for social, Publics and individuals in the Society of Particular research area. And, end of this research study researcher have found some conclusion and finding based on this research objectives. Such as most of the school students are switch and agree with separate boys and girls school, some students are dislike to separate boys and girls schools. According to this research conclusion most of the male students are released against to the separate school systems. More than 80% of the parents are likes and reveal their opinion support for separate school systems. And few amounts of parents are like to support for mixed school systems in this research area. Because, telephone conservation and love amour on sexual attraction are main reasons to parents are like to select separate schools. Mixed schools are major reason for these social effects.
