ABSTRACT

Mohamed Jabarullah Ashik Mohamed developed aWeb-based School Management System for Kattankudy Centaral College.

The objective of this thesis project is to develop aWeb-based School Management System website that is in simple terms a Web-based information system.

The Web-based School Management System opting for simplicity and inter connectedness is an example of WEB 2.0, that emphasize on information sharing, inter operability and user centered design.

This project therefore including the programming of main function focuses on the user interface development the implementation of ASP.NET technology.

In conclusion the project succeeded both in target of achieving objectives of founding a user friendly portal for mainstream web users and giving an enhancement in maintainability and expandability aspect.
