Abstract

The objective of this project is based on the Vehicle Revenue Licence issuing system of Bandaragama DS located in Bandaragama in Kalutara district. This project helps to above DS implement a new system for facilitating of the Finance section work make easier.

The project proposed, intends to create a Revenue licence issuing system which is maintaining many details related to Vehicles; such as Vehicle details, Revenue licence details, Report, etc. The computerized system manages the Vehicle details professionally. The Vehicle Revenue Licence details stored in to system. And also Vehicle details, Report Form details, Revenue Licence form stored in the system.

Keeping track of records of all day today activities done by administrator and retrieving, manipulating and storing data would be maintained through the database. It would make possible searching the past records and generating the required reports. These facts are carrying out an efficient service with reduction of work load.

All the interfaces are user friendly, The Vehicle Revenue Licence issuing system project including the C Sharp (C#) programming language of main function focus on the user interface development.
