ABSTRACT

Zonal education office is a governmental service organization situated in Batticaloa. Manage teachers details is the main activity of this organization .

As it has been managing its teacher information manually, it encounters a number of problems. That lead to an unhealthy situation resulting in low productivity and inefficient management.

In order to eliminate those problems an Information system called Teachers Information System has been developed.

This system can be used to store, modify and delete data about teachers and produce reports about beneficiary as needed by management.

In order to develop this system Micro soft Visual c# language and Micro soft Access has been used. It is believe that system would be useful one to run the organization efficiently and to take a management decision in time.
