Abstract

W.M.S.D Eregoda developed a windows based Office Management Information **System** for Audio Visual Center.

The objective of this thesis project is to develop an Office Management Information **System** that is in simple terms a windows based Office Management System.

The office Management information system opting for effortlessness and inter **connectedness** is an example of .NET Framework4. That emphasize on information **sharing**, inter operability and user centered design.

This project therefore including the programming of main function focuses on the **user interface** development the implementation of .NET technology.

In termination the project succeeded both in target of achieving objectives of **beginning** a user friendly entrance for mainstream windows user and giving an **enhancement** in maintainability and expandability aspect.
