ABSTRACT

Mohamed MarikkarFathimaFazha developed a Windows based Shop Billing System for Global Stores-Matara.

The objective of the application is to provide a simple, fast, effective and robust environment to the users for controlling and sustaining and which is to improve the current system that the Global stores-Matarais using. Another objective is the system should be user-friendly and easy to maintain. The system produced should be easily modified to address any form of constraints in an actual situation. The system should also be robust and produce a feasible solution for any big problem.

This project therefore including the programming of main function focuses on the user interface development the implementation of c sharp technology.

In conclusion the project succeed both in target of achieving objectives of founding a user friendly for user and giving an enhancement in maintainability and expandability aspect.
