ABSTRACT

Website is a collection of web pages. Web pages are presentation of information which can be presented using a carefully chosen media most appropriate for your content. In order to design these pages to use special tools and techniques such as,

- Adobe Photoshop CS for image editing purpose.
- Macromedia Flash to animate images and texts
- Macromedia Fireworks to create buttons and Pop-up menus.
- Macromedia Dreamweaver to design the web pages.

Websites are mainly categorized into two main types.

- Commercial website.
- Non-Commercial website.

Due to the requirement of the SSB, I am going to develop an eye-catching, user-friendly, and non-commercial website. Special feature of this website is that it has a language preference that is the client can choose their preferred language (English, Tamil, and Sinhala) to get the information.
