Abstract

The objective of this project is based on the managing student information of star academy located in kahatowita in gampaha district. This project helps to above academy implement a new system for facilitating of the administrative work make easier.

The project proposed, intends to create a student information system which is maintaining many details related to students; such as student details, payment details, subject details, etc. The computerized system manages the student details professionally. The students details stored into system. And also subject details, class details, payment details stored in the system.

Keeping track of records of all day today activities done by administrator and retrieving, manipulating and storing data would be maintained through the database. It would make possible searching the past records and generating the required reports. These facts are carrying out an efficient service with reduction of work load.

All the interfaces are user friendly, the student information system project including the C Sharp (C#) programming language of main function focus on the user interface development.
